Project Progress:

We made huge steps forward in developing the set of minigames that will support the international project managers in strengthening their skills needed for their everyday work. The scenes of the minigames are now in their final form, and ready to be uploaded to the social site, Facebook. In fact a trial version is already set up.

The partnership is presently setting up a site, connected to the project's webpage, where the games and the additional information, and further support materials.

And we also made a new promo video

With Love from Vicenza

The partnership had a really productive meeting on the February, 20th-21st 2014 in Vicenza, Italy. All partner organization managed to participate, and our minds were opened and full of ideas on how to spice up the project progress and outcomes. The partners agreed, that a sort of platform should host the starting point for the minigames, but also, some support material is also needed explaining why did the partnership chose:

- the method of learning by playing
- the 6 competences chosen

Furthermore, the partnership agreed in the structure of the final conference in Hungary. The date of the Conference will be the 8th of October 2014. This event will be interactive, therefore, after a general introduction to the project, the participants will be organised into groups and attending workshops, testing the minigames and exchanging thoughts regarding IPM competences. This event will also have room for the presentation of other similar EU projects, and we would also welcome students and project management consultancies, providing them a common ground for further cooperation.

The learning platform of LPMnAge:

The partnership set up a structure and agreed in the content of the learning platform, where the minigames can be found, together with some supporting material. These menu points are:

What will you find here?

The general description of the games, and the way to use them.

Learning by Playing

The description of this method and its benefits. Also introduces the analysis on game based learning techniques the partnership carried out last year.

Dear James **Are you a good IPM?**

Giving background information on the 6 competences that were identified as the most important skills for an IPM.

And of course a direct link to the **minigames**

Conference in September 2014

We are happy to announce that the LPMnAge project will organise a final conference on the 8th of September 2014, in Hungary. During the conference the visitors will participate in workshops where they can test and analyse the minigames and the educational platform. The conference will also provide room for other projects of similar fields to introduce themselves and the experts and target group members to meet and change experience.
